Note I: Major source of data for completion of these matrices is Iowa's Justice Data Warehouse (JDW). The decision points (population at risk,

arrests, detention, corrections) were taken from other data sources.

Note II: The matrices reflect detention as a decision occurring after "referral" and before "petition". In Iowa, detention occurs at many stages of juvenile justice processing. It is unknown in the above data, at what system decision point these detention holds took place. Users should note accordingly.

Note III: The effect on subsequent decision point calculations in the matrix from underreporting of UCR data, and from the source of the UCR data being separate from the JDW is unknown.
